

AI-Powered Patient Onboarding Hub

Project Documentation

Salesforce Agentforce • Version 1.0

Submitted: August 19, 2026

1. Executive Summary

This project delivers an AI-powered patient intake assistant built on the Salesforce Agentforce platform. The solution automates the initial patient registration and information gathering process, enhancing efficiency and patient experience in healthcare settings.

The agent handles three core workflows:

- Patient Information Collection – Gathers patient demographics and visit details
- Insurance Verification – Collects and verifies insurance coverage
- Appointment Scheduling – Finds available slots and books appointments

2. System Architecture

2.1 High-Level Architecture Diagram

2.2 Key Components

Component	Description
Agent Router	Classifies patient intent and routes to the appropriate subagent
PatientInfoCollection	Collects name, DOB, contact information, and reason for visit
InsuranceVerification	Collects insurance provider and member ID
AppointmentScheduling	Finds available slots and books appointments
GeneralFAQ	Answers clinic questions using knowledge articles
Escalation	Transfers to a human agent when needed
Off-Topic	Handles unrelated questions politely
Ambiguous Question	Clarifies vague requests

2.3 Variables

Variable	Type	Purpose
----------	------	---------

patientName	mutable string	Stores patient's full name
patientDateOfBirth	mutable string	Stores patient's DOB
patientContactInfo	mutable string	Stores phone or email
insuranceMemberId	mutable string	Stores insurance member ID
appointmentConfirmationId	mutable string	Stores booking confirmation

3. Subagent Details

3.1 PatientInfoCollection

Purpose: Collects patient demographics and visit information.

Workflow:

1. Greet patient
2. Ask for full name → stores in patientName
3. Ask for date of birth → stores in patientDateOfBirth
4. Ask for contact information → stores in patientContactInfo
5. Ask for reason for visit
6. Confirm all details with patient

Sample Conversation:

Agent: "What is your full name?"

Patient: "John Smith"

Agent: "What is your date of birth?"

Patient: "January 15, 1980"

3.2 InsuranceVerification

Purpose: Collects and verifies insurance coverage.

Workflow:

7. Ask for insurance provider name
8. Ask for member ID → stores in insuranceMemberId
9. Verify coverage (placeholder action)
10. Communicate results to patient

Sample Conversation:

Agent: "What is your insurance provider?"

Patient: "Blue Cross"

Agent: "What is your member ID?"

Patient: "BC123456789"

3.3 AppointmentScheduling

Purpose: Finds available slots and books appointments.

Workflow:

- 11. Ask for preferred date
- 12. Ask for preferred time
- 13. Confirm details with patient
- 14. Book appointment (placeholder action)
- 15. Store confirmation ID in appointmentConfirmationId

Sample Conversation:

Agent: "What date would you prefer for your appointment?"

Patient: "Next Tuesday"

Agent: "What time of day would you prefer?"

Patient: "10:00 AM"

Agent: "Confirm: Tuesday, August 25, 2026 at 10:00 AM?"

4. User Guide

4.1 How to Access the Agent

- 16. Navigate to Setup → Agentforce Agents
- 17. Select "Patient Intake Assistant"
- 18. Click the "Let's chat!" tab at the bottom

4.2 How to Use the Agent

Patient Need	What to Type	Agent Action
New patient intake	"I'm a new patient"	Collects name, DOB, contact, reason
Insurance verification	"Verify my insurance"	Collects provider and member ID
Schedule appointment	"Book an appointment"	Collects date and time
General question	"What are your hours?"	Searches knowledge articles
Escalate to human	"Speak to a person"	Transfers to live agent

4.3 Complete Conversation Example

Patient: "Hi, I need to schedule an appointment"

Agent: "I can help you with that. What date would you prefer for your appointment?"

Patient: "Next Tuesday"

Agent: "Next Tuesday is August 25, 2026. What time of day would you prefer?"

Patient: "10:00 AM"

Agent: "You would like to schedule an appointment for next Tuesday, August 25, 2026, at 10:00 AM. Can you confirm this is correct?"

Patient: "Yes"

Agent: "Thank you! I will submit your request to the clinic's scheduling system. You will receive a confirmation once the booking is complete."

5. Implementation Summary

5.1 What Was Built

Component	Status
Agentforce Service Agent	✔ Complete
3 Healthcare Subagents	✔ Complete
5 Patient Variables	✔ Complete
Router with 7 Routes	✔ Complete
Welcome & Error Messages	✔ Complete
Placeholder Actions	✔ Complete

5.2 Key Challenges Overcome

Challenge	Solution
Invisible Unicode characters blocking compilation	Rewrote entire file cleanly
Invalid source fields on custom actions	Removed source, kept placeholder targets
Legacy subagent cleanup	Replaced all 6 legacy subagents with 3 healthcare ones
Git commit issues	Committed directly in Agentforce Builder

6. Testing & Validation

6.1 Test Cases Executed

Test Case	Expected Result	Status
Welcome message displays	Greeting appears	✔ Pass
"Book appointment"	Routes to AppointmentScheduling	✔ Pass
"Verify insurance"	Routes to InsuranceVerification	✔ Pass
"New patient"	Routes to PatientInfoCollection	✔ Pass
Date parsing	"Next Tuesday" → August 25, 2026	✔ Pass
Confirmation flow	Confirms before booking	✔ Pass

7. Conclusion

The AI-Powered Patient Intake Assistant successfully demonstrates how Salesforce Agentforce can transform healthcare patient onboarding. The agent:

- ✔ Automates manual intake processes
- ✔ Improves patient experience

- ✓ Reduces administrative burden
- ✓ Provides 24/7 availability
- ✓ Scales across multiple care programs

8. Appendix

8.1 Agent Configuration Summary

Configuration	Value
Agent Name	Patient Intake Assistant
Agent Template	Agentforce Service Agent
Developer Name	reema
Subagents	8 (Router + 7 subagents)
Variables	10 (5 custom + 5 linked)
Language	en_US

8.2 File Structure

```
agent.agent
├─ system (instructions, messages)
├─ config (agent details)
├─ access (user permissions)
├─ variables (patient data)
├─ language (locale settings)
├─ knowledge (RAG configuration)
├─ start_agent (router with 7 routes)
├─ subagent PatientInfoCollection
├─ subagent InsuranceVerification
├─ subagent AppointmentScheduling
├─ subagent GeneralFAQ
├─ subagent escalation
├─ subagent off_topic
└─ subagent ambiguous_question
```
